

1.Moonlighting

- a. Any professional clinical activity (moonlighting) performed outside of an official residency program will only be conducted with the permission of the program administration (DME/program director) and must not interfere with the resident's didactic or clinical performance.
 - i. A written request by the resident must be approved or disapproved by the program director and DME and be filed in the institution's resident file.
 - ii. This policy must be published in the institution's house staff manual. Failure to report and receive approval by the program may be grounds for terminating a resident's contract.
- b. If moonlighting is permitted, hours shall be inclusive of the 80 hour per week maximum work limit and must be reported and monitored by the MEC.
- c. OGME-1 trainees shall be prohibited from moonlighting.
- d. The residents shall not be required to engage in "moonlighting."
- e. It is the responsibility of the resident moonlighting or seeking to moonlight to ensure that he/she is licensed appropriately.
